**FIRST AMENDMENT
TO
CONTRACT No. 02918
SURVEY AND MAPPING EQUIPMENT AND SUPPLIES**

This First Amendment ("Amendment") to Contract No. 02918 is made and entered into by and between the State of Washington acting by and through the Department of Enterprise Services, a Washington State governmental agency ("State") and Trimble, Inc., a Delaware Corporation ("Contractor") and is dated and effective as of April 23, 2021.

RECITALS

- A. State and Contractor (collectively the "Parties") entered into that certain Contract No. 02918 for Survey and Mapping Equipment and Supplies dated effective as of December 1, 2018 ("Contract").
- B. The amendment set forth herein is within the scope of the Contract.
- C. The Parties now desire to amend the Contract as set forth herein.

AGREEMENT

NOW THEREFORE, in consideration of the mutual covenants and agreements set forth herein, the Parties hereby agree to amend the Contract, as follows:

1. EXHIBIT B: Exhibit B is hereby updated by deleting the existing Exhibit B in its entirety and replacing with the attached. This includes:
 - "Brand Specifications & Price Evaluation" (updated 4.23.21)
 - Catalog "Trimble Survey USA" (updated 4.23.21)
 - Catalog "Trimble Spectra Precision"
 - Catalog "Trimble Rental"

The updated exhibit shows all items available on contract, including deleted items no longer available through this Contractor (Deleted Effective 4/23/2021), and new items made available (Added Effective 4/23/2021) within the identified categories since the execution of this master contract.

2. NO CHANGE OTHER THAN AMENDMENT. Except as amended herein, the Contract is unaffected and remains in full force and effect.

3. INTEGRATED AGREEMENT; MODIFICATION. This Amendment constitutes the entire agreement and understanding of the Parties with respect to the subject matter and supersedes all prior negotiations and representations. In the event of any conflict between this Amendment and the Contract or any earlier amendment, this Amendment shall control and govern. This Amendment may not be modified except in writing signed by the Parties.
4. AUTHORITY. Each party to this Amendment, and each individual signing on behalf of each party, hereby represents and warrants to the other that it has full power and authority to enter into this Amendment and that its execution, delivery, and performance of this Amendment has been fully authorized and approved, and that no further approvals or consents are required to bind such party.
5. ELECTRONIC SIGNATURES. A signed copy of this Amendment or any other ancillary agreement transmitted by facsimile, email, or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original executed copy of this Amendment or such other ancillary agreement for all purposes.
6. COUNTERPARTS. This Amendment may be executed in one or more counterparts, each of which shall be deemed an original, and all of which counterparts together shall constitute the same instrument which may be sufficiently evidenced by one counterpart. Execution of this Amendment at different times and places by the parties shall not affect the validity thereof so long as all the parties hereto execute a counterpart of this Amendment.

EXECUTED AND EFFECTIVE as of the day and date first above written.

SP80 GNSS Receiver

The Spectra Precision SP80 is a new generation GNSS receiver. The SP80 uses a unique, all signal tracking and processing Z-Blade technology to provide the most reliable measurements and the highest possible accuracies. It also offers the best communications and connectivity capabilities available today including SMS and email alerts and anti-theft protection. The ergonomic design and unlimited operating time make the SP80 an extremely versatile and complete solution.

Note: To activate radio frequencies in any SP80 requires ADLConf software and PCC-A02672 ADLConf Dealer Hardware Lock Kit.

SP60 GNSS Receiver

The Spectra Precision SP60 is a new generation GNSS receiver offering a high level of flexibility to cover any survey demand from simple post-processing, through UHF or Long Range Bluetooth base and rover systems to sophisticated RTK and RTX rover solutions. Combining the unique all-signals-tracking and processing Z-Blade GNSS-centric technology and L-band capability for satellite-delivered RTX services, the SP60 GNSS receiver provides the most reliable measurements and the highest possible accuracy under any conditions and in any place in the world.

Note: To activate radio frequencies in any SP60 requires ADLConf software and PCC-A02672 ADLConf Dealer Hardware Lock Kit.

SP20

The Spectra Precision SP20 handheld GNSS receiver combines innovative, camera-enabled data collection workflow with a high level of performance in an ergonomic, scalable solution (from meter to cm accuracy). Rugged and lightweight, the SP20 is easy-to-use and highly accurate. It is the optimal tool not only for cadastral, construction, or topo surveys, but also for a range of GIS projects, including data collection, inspection and maintenance. The 5.3-inch screen delivers vivid visuals of the workflow, which enables precise 2D handheld logging. And the system's high degree of accuracy can be enhanced with a monopole accessory to deliver solid, survey-grade 3D measurements. Whatever type of geospatial work you're performing, turn to the easy-to-use SP20 handheld that consistently delivers highly accurate results

SP90m GNSS Receiver ⏪

The Spectra Precision SP90m is a powerful, highly versatile, ultra-rugged, and reliable GNSS positioning solution for a wide variety of applications in real-time and post-processing. It also comes with a variety of integrated communications options, such as Bluetooth, WiFi, UHF radio, cellular modem, and two MSS L-band channels to receive Trimble RTX correction services. The modular form factor of the SP90m allows for a maximum in flexibility on how the receiver can be used, such as base station, continuously operating reference station (CORS), RTK or Trimble RTX rover, on-board machine integration, vessels, etc.

- Note:** To order a complete SP90m GNSS Receiver, please follow these steps
1. Select a SP90m GNSS receiver model (non-geofenced WW models, geofenced China and Latin America models).
 2. Add a country specific power cord.
 3. Add a GNSS antenna and GNSS antenna cable.

Same as SP90M-101-60, but geo-fenced for Latin America

consisting of:

PN 206490-ASH - Spectra Precision Transport Bag
 PN 108701-60 - SP90m GNSS Receiver with internal 410-40 MHz UHF radio (Latin America geo-fence applied)
 Firmware Options included:
 Constellation Support: GPS, QZSS, GLONASS, BeiDou, Galileo, IRNSS, SBAS
 Frequency Tracking: L1, L2, L5, L6
 L-band
 Operation Modes: Data Logging, Base, Rover, RTX, Dual GNSS
 Cellular Modem Activation
 WiFi Activation
 20Hz Output Rate (Fast Output Upgrade Option to 50Hz sold separately)
 PN 111403 - Bluetooth antenna SMA
 PN 44085-60 - Antenna 5" Whip - TNC 410-470MHz Radio
 PN 89840-00-SPN - Rechargeable Battery (7.4V, 3700 mAh, 27.3 Wh)
 PN 53018010-SPN - Charger - Dual Li-Ion Battery Charger
 PN 83664-00 - Battery Spacer Inserts for Dual Li-Ion Battery Charger (Qty = 2)
 PN 107000 - Power Supply, 65W, 19V, 3.43A, 100-240VAC, Class VI
 PN 59044 - Cable - 1.5m, DB9(F) Y to 0S/7P/M to Power Jack
 PN 107535 - OTG Cable USB A to Mini USB B

PN 93374 - Tape Measure, 3.6m / 12ft
 PN 113837 - Quick Start Guide SP90m (English)
 PN 111891 - SP90m Shipping Label
 2 year manufacturer's warranty

ProFlex 800 GNSS Receiver

The ProFlex 800 GNSS receiver is a multi-frequency and multi-constellation GNSS solution in an ultra rugged, highly integrated receiver design. Using Z-Blade GNSS centric technology, ProFlex 800 delivers fast and reliable RTK position even in harsh environments. ProFlex 800 is ideal for backpack rover precise surveying, reference station solutions or mounted on a vehicle for onboard operations.

Note: The following cable must be specified for connection to external Pacific Crest ADL Vantage or Vantage Pro Radios - use cable PCC-A00630. (Also applies for PDL High Power Base Radios.)

SP20

The Spectra Precision SP20 handheld GNSS receiver combines innovative, camera-enabled data collection workflow with a high level of performance in an ergonomic, scalable solution (from meter to cm accuracy). Rugged and lightweight, the SP20 is easy-to-use and highly accurate. It is the optimal tool not only for cadastral, construction, or topo surveys, but also for a range of GIS projects, including data collection, inspection and maintenance. The 5.3-inch screen delivers vivid visuals of the workflow, which enables precise 2D handheld logging. And the system's high degree of accuracy can be enhanced with a monopole accessory to deliver solid, survey-grade 3D measurements. Whatever type of geospatial work you're performing, turn to the easy-to-use SP20 handheld that consistently delivers highly accurate results

Ranger 300X/500X

The Ranger™ data collector features the Windows Mobile® 5.0 operating system, an ergonomic keypad and military-grade durability. Wireless capabilities let you connect without cables. The Ranger comes in two models; the 300X and the powerful 500X. The Ranger 300X has a 312MHz processor with 64MB of SDRAM and 256MB of on-board Flash and integrated Bluetooth, while the Ranger 500X has a 520MHz processor with 128MB of SDRAM and 512MB of on-board Flash storage and integrated Bluetooth. The Ranger also has the option for integrated 802.11 wireless on the 500X. The Ranger also offers USB host and client ports. CompactFlash (CF) and Secure Digital (SD) slots enables multiple accessories and increased data storage. The Ranger's two CF slots allow GPS, GPRS, bar code scanners and other CF devices to be added. Optional CF caps accommodate larger devices.

Standard accessories include;

- AC charger
- USB interface cable
- Hand strap
- Package of two screen protectors
- Two stylus pens
- Rechargeable PowerBoot Module™ (with Li-Ion batteries)

Spectra Precision MM20 Data Collector with Software

MM20 Data Collector

The Spectra Precision MM10 Data Collector is an entry-level data collection platform delivering performance and reliability in a lightweight but rugged design. It's dust-proof and waterproof and weighs just 380g (13 ounces) for effortless operations in the field. Moreover it features extremely long battery life (over 20 hours) making it a perfect tool for long working days.

The MM10 Data Collector provides a wide range of internal wireless capabilities, including Bluetooth, wireless LAN (WiFi), but also built-in GSM/GPRS modem, which make this device very flexible and useful for survey data collection.

It comes equipped with a choice of field software: the advanced and powerful Spectra Precision Survey Pro software, or the popular FAST Survey field software. Other features include the Windows Embedded Handheld 6.5 operating system, integrated 5M pixel digital camera, and even internal GPS, offering a very powerful and capable device, yet at a very competitive price.

Note: The MM20 data collector does not have a physical RS232 port, and is therefore only suitable for use with a total station via Bluetooth.

Spectra Precision ForeSight Software

ForeSight and ForeSight DXM are now discontinued.

ForeSight™ gives you better ways to view, manage and analyze your survey data. ForeSight helps you manage project files, check data for accuracy and completeness, graphically view your raw data, and prepare data for field survey or CAD development. ForeSight has geodetic functions that can be used with Survey Pro GNSS or Survey Pro Max. You can import and export LandXML and DXF files, as well as Job, Coordinate and Raw Data Files and Point Lists.

ForeSight is a powerful, complete program designed for versions of Windows from 95 to XP. Additional copies or seats of Office software are available at discounted prices. These additional seats do not include manuals. USB port hardware locks will ship unless otherwise specified.

A dealer demo copy of the complete ForeSight bundle is available for \$150.00. The dealer demo copy is date stamped for one year and is renewable at no charge.

Layout Pro Solutions

Layout Pro

Spectra Precision Layout Pro Field and Spectra Precision Layout Pro Office Spectra Precision building construction positioning solutions give contractors more control of their job sites allowing significant improvements in construction accuracy and productivity. The pocket-sized Spectra Precision® Layout Pro Field software lets you carry, manage, work with, and lay out your job site blueprint.

Using the Layout Pro Field onboard with a Spectra Precision FOCUS 8/Nikon C Series Total Station or with Bluetooth Wireless connection to FOCUS 6/Nikon M Total Stations or directly to a Nikon DTM or NPL series and the Layout Pro Office software- you can:

- * take CAD designs and data into the field.
- * lay out complex concrete forms or anchor bolts from any location by referencing any two known points.
- * lay out control points and offset hubs faster and more cost-effectively work on your schedule.
- * lay out all lines from one reference location with no string lines, transits or theodolites.
- * make minor adjustments to the building position as needed without waiting or paying subcontractor fees.
- * check the work of others and create documentation for change orders when necessary. Reflectorless measurement capabilities make as-built checks a one-person job.
- * lay out control lines for subcontractors faster and more accurately than with tapes and theodolites.
- * easily collect topographical data and import it into third-party software for elevation and cut and fill analysis.

Layout Pro is currently supported on the Ranger 3 and Nomad data collectors.

Twelve month **Extended warranties** are available up to a maximum of four.
