All Equipment and Products provided under this Contract must be new and the current model. Supplier may offer close-out or refurbished Equipment or Products if they are clearly indicated in Supplier's product and pricing list. Unless agreed to by the Participating Entities in advance, Equipment or Products must be delivered as operational to the Participating Entity's site.

This Contract offers an indefinite quantity of sales, and while substantial volume is anticipated, sales and sales volume are not guaranteed.

C. **DEALERS, DISTRIBUTORS, AND/OR RESELLERS.** Intentionally omitted.

3. PRICING

All Equipment, Products, or Services under this Contract will be priced at or below the price stated in Supplier's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location.

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. **SHIPPING AND SHIPPING COSTS.** All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. If the damage is not readily apparent at the time of delivery, Supplier must permit the Equipment and Products to be returned within a reasonable time at no cost to Sourcewell or its Participating Entities. Participating Entities reserve the right to inspect the Equipment and Products at a reasonable time after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Supplier as soon as possible and the Supplier will replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity.

Supplier must arrange for and pay for the return shipment on Equipment and Products that arrive in a defective or inoperable condition.

Sourcwell may declare the Supplier in breach of this Contract if the Supplier intentionally delivers nonconforming Equipment or Products.

When ordering, a Participating Entity must indicate if it is a tax-exempt entity. Sales tax will be invoiced, if applicable, when valid exemption documentation is not on file with Supplier.

When Supplier determines it will offer Hot List Pricing, it must be submitted electronically to Sourcwell in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcwell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

4. PRODUCT AND PRICING CHANGE REQUESTS

Supplier may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcwell Price and Product Change Request Form to the assigned Sourcwell Supplier Development Administrator. Typically, a Participating Entity will issue an order directly to Supplier or its authorized subsidiary, distributor, dealer, or reseller. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell contract number. All Participating Entity orders under this Contract must be issued prior to expiration or cancellation of this Contract; however, Supplier performance, Participating Entity payment obligations, and any applicable warranty periods or other Supplier or Participating Entity obligations may extend beyond the term of this Contract.

Supplier's acceptable forms of payment are included in its attached Proposal. Participating Entities will be solely responsible for payment and Sourcwell will have no liability for any unpaid invoice of any Participating Entity.

Some Participating Entities may require the use of a Participating Addendum; the terms of which will be negotiated directly between the Participating Entity and the Supplier. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract, and Supplier and Participating Entity may determine by agreement that the negotiated additional terms and conditions are not less favorable to the Participating Entity than the terms of this Contract.

C. **SPECIALIZED SERVICE REQUIREMENTS.** In the event that the Participating Entity requires service or specialized performance requirements not addressed in this Contract (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements), the Participating Entity and the Supplier may enter into a separate, standalone agreement, apart from this Contract. Sourcwell, including its agents and employees, will not be made a party to a claim for breach of such agreement.

McKesson ScanManagerSM – McKesson ScanManagerSM is an inventory management system that puts the power to control costs in the hands of Participating Entities. This bar-code technology helps users to assemble orders and compile supply management information. Orders originate in the storeroom, where users scan bar codes to compile orders to be sent over the Internet. Participating Entities can check orders online to determine product availability and shipping status. Creating orders at the source helps organize both storeroom and ordering processes, reducing costs by reducing inventory fluctuations that cause

overstocks, understocks and aging inventory. Management reports generated by the McKesson ScanManagerSM system help Participating Entities analyze purchasing trends and compile budget and forecasting information. This application may be subject to fees associated with installation and hardware.

Other Technologies – Electronic Interface – MMSGGS has been active in EDI and cXML development and implementation for many years. 42	Describe any "green" initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	<p>Our transportation strategy focuses on optimizing delivery routes and the efficient use of delivery vehicles. To do that, we monitor mileage and fuel consumption, and we educate our drivers on eco-efficient driving. In Europe and the United States, we use a standard route optimization software solution, which helps our drivers find the most fuel-efficient routes for deliveries. Patients, pharmacies and hospitals depend on our medical supplies, making reliable and efficient last-mile delivery performance crucial to our business and customers' success and health. This tool enables us to continue to fulfill our customer service levels while reducing mileage, saving time, cutting down emissions, and minimizing unused vehicle capacity. In some geographies, we own our fleet. When buying or leasing new vehicles, we look for key criteria including fuel consumption and low carbon emissions, as well as ensuring the vehicles adhere to high quality standards. When we purchase or lease vehicles in the U.S., we specify such attributes as aerodynamic vehicle components to reduce drag and increase fuel economy. We also use lightweight materials for key components, and engine mapping technology to increase fuel efficiencies. Our fleet in North America has already seen the impact of these efforts, and we continue to adjust our fleet to increase efficiency. Trailers are also equipped with skirts that improve aerodynamics and help reduce fuel consumption, and we run bulkheads in our trailers for more efficient airflow and less use of refrigerant fuel. We are exploring additional opportunities to electrify our fleet. In Europe, our fleet is comprised of 55 electric (EV) or hybrid vehicles and we anticipate purchasing additional EVs as well. In addition, we have replaced some internal combustion engine vehicles with electric delivery bikes. These bicycles enable us to reduce our fuel consumption related to deliveries. In the U.S., we are enthusiastic at the prospect of increasing the number of electric vehicles we use to deliver key pharmaceutical and medical supplies across the country. We test EVs and compressed natural gas (CNG) vehicles to determine potential. In Europe and the United States, we use a standard route optimization software solution, which helps our drivers find the most fuel-efficient routes for deliveries. This tool enables us to continue to fulfill our customer service levels while reducing mileage, saving time, cutting down emissions, and minimizing unused vehicle capacity. opportunities to incorporate them into our fleet and realize emissions reductions. Our U.S. Medical-Surgical business, which owns and operates the largest fleet within our enterprise, recently placed its first order of EVs — marking the beginning of integrating these vehicles into our overall strategy.</p> <p>In fiscal year 2018 (FY18), McKesson made a commitment to design new office buildings in accordance with a newly developed connected buildings standard. We're also making an ongoing effort to apply this standard retroactively to as many existing assets as practical. This technology will give our teams elevated visibility to building operations, as well as a real-time analytics platform to identify and diagnose inefficiencies in HVAC, lighting and other building systems. We anticipate these findings will result in energy savings and extended equipment lifetimes. In FY21, we transitioned locations in Jacksonville, Fla.; Scottsdale, Ariz.; and Irving, Texas, into the program, and began similar work in Columbus, Ohio, and Mississauga, Ontario. We implement lighting retrofit projects to convert less efficient lighting fixtures to LEDs, which use far less electricity. Since FY20, in the U.S., we have realized an estimated average reduction of 23% in our electricity use at participating buildings due to these LED installations across 30 locations covering more than 6.3 million square feet. This equates to a reduction of 19.9 million kilowatt hours (kWh) of electricity. In FY21, we expanded the program to 450,000 additional square feet across two distribution centers. Leadership in Energy and Environmental Design (LEED) As part of McKesson's energy reduction strategy, we pursue Leadership in Energy and Environmental Design certification (LEED), when feasible, for newly constructed or renovated U.S. offices. We have earned LEED for Commercial Interiors Gold certification for Building 3 in Scottsdale, Ariz., in October 2020, and earned LEED for Commercial Interiors Silver certification for offices in Jacksonville, Fla. Jacksonville is also undergoing WELL Building certification. These two LEED certified offices join our portfolio of already-certified buildings, which includes offices in Irving, Texas; Richmond, Va.; San Francisco, Calif.; The Woodlands, Texas; the other two office buildings in Scottsdale, Ariz.; and our distribution center in Aurora, Ill.</p> <p>In addition to reducing our overall electricity emissions, we also work to increase the amount of renewable energy in our portfolio. In FY21, we signed two contracts to purchase local, physical renewable energy for most of the company's locations in Texas. The agreements provide approximately 40.5 million kWh of energy per year primarily sourced from the Foard City Wind Farm and Sweetwater Wind Farm in Texas, along with the concurrent Renewable Energy Credits (RECs). Energy from these wind farms will fully power participating facilities, including our headquarters building in Irving, Texas, beginning in 2022.</p> <p>The 1.1 megawatt (MW) rooftop solar array at our West Sacramento, Calif., distribution center has been live since FY20, and produced electricity equivalent to more than two-thirds of the facility's annual consumption in its first year. Construction is expected to be completed by FY23 on a larger, 2.7 MW solar array at our distribution center in Robbinsville, N.J.</p>

PROPOSER AFFIDAVIT AND ASSURANCE OF COMPLIANCE

I certify that I am the authorized representative of the Proposer submitting the foregoing Proposal with the legal authority to bind the Proposer to this Affidavit and Assurance of Compliance:

1. The Proposer is submitting this Proposal under its full and complete legal name, and the Proposer legally exists in good standing in the jurisdiction of its residence.
2. The Proposer warrants that the information provided in this Proposal is true, correct, and reliable for purposes of evaluation for contract award.
3. The Proposer, including any person assisting with the creation of this Proposal, has arrived at this Proposal independently and the Proposal has been created without colluding with any other person, company, or parties that have or will submit a proposal under this solicitation; and the Proposal has in all respects been created fairly without any fraud or dishonesty. The Proposer has not directly or indirectly entered into any agreement or arrangement with any person or business in an effort to influence any part of this solicitation or operations of a resulting contract; and the Proposer has not taken any action in restraint of free trade or competitiveness in connection with this solicitation. 4. To the best of its knowledge and belief, and except as otherwise disclosed in the Proposal, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest. An organizational conflict of interest exists when a vendor has an unfair competitive advantage or the vendor's objectivity in performing the contract is, or might be, impaired.

At that point, proposals become public data. Minnesota Statutes Section 13.37 permits only certain narrowly defined data to be considered a "trade secret," and thus nonpublic data under Minnesota's Data Practices Act.
