## Category 1300 Survey Adjustment Products (Network Least Squares)

This program, unlike other Network Least Squares program, automatically means all horizontal and vertical angles including slope distances. No need to manually mean and input all multiple direct or reverse or closed horizon pairs of angles and distances; SurvNET does this automatically.

| Part ID      | Description                   | Retail   |
|--------------|-------------------------------|----------|

## Category 6000 Data Collectors & Tablets bundled w/ SurvCE/PC

Data Collectors with software are offered with either Basic (TS) or GPS. You will need to go to category 6506 or 6606 to add other options. References to SurvCE GPS on a data collector means that it has GPS only and does not include Basic.  
Note: All Mini2s, Surveyor2s and Surveyor+ units come with all the necessary international charging adapters. Failure to use the correct adapters may damage the unit and will void the warranty.

Carlson Software does not provide instrument cables with the data collectors.

Carlson offers a variety of cradles and pole clamps that are designed specifically for use with Carlson products. Those products are listed in these price pages. Use of the incorrect bracket may cause damage to the data collector and would not be covered under warranty.

\*\* Carlson Data Collectors are only sold with Carlson SurvCE, CSI mobile or Carlson SurvPC data collection software. We make individual units available as replacement for severely damaged units. In order to purchase these units, you must submit a current Carlson serial number with the order. Orders will not be accepted without it.

## Category 6606 Carlson SurvPC

SurvPC has been tested on and approved to work on the Carlson RT3, Juniper Mesa 2, Handheld Algiz, and Panasonic M1 only. If a customer has interest in another type or brand of tablet it is recommended that they obtain the 30 day trial version of SurvPC and thoroughly test before purchasing any product.

For SurvPC compatability with ESRI Arc GIS, please note on order form to enable the ESRI engine. Arc GIS engine sold seperately.

| Part ID      | Description                                                           | Retail     |

| 8010.999.000                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Datacollector and Tablet Extended Warranties                       |          |
| <p><i>Carlson/Juniper Service Plans can be purchased in one-year, three-year, and five-year increments, to a maximum of five years from the original manufacturing ship date. The benefits for the three-year and five-year plans begin from the original ship date of the handheld and will remain in force for full-year increments for the number of years purchased (Term). The benefits for the one-year plan begin when the order is processed and end one year after the original warranty or a Carlson/Juniper Service Plan expires, whichever is later. The three-year and five-year plans are only available at the time of the handheld purchase. Carlson/Juniper Service Plans are purchased for individual handhelds referenced by a specific serial number. Renewals must be purchased before the existing warranty or Carlson/Juniper Service Plan expires to prevent having to return the handheld for an evaluation. For handhelds that are currently not covered by their original standard product manufacturer's warranty, or by a Carlson/Juniper Service Plan, and the handheld is not older than five years from its original manufacturing ship date, the handheld must be submitted to a participating repair center for evaluation to qualify for Carlson/Juniper Service Plans. This evaluation, and any repairs that are required, will be billed at the standard hourly rate of the participating repair center. Contact Carlson/Juniper Systems' Customer Service Department for the nearest participating repair center in your area. The handheld must have been used in accordance with the published specifications. If misuse, abuse, or fraud is suspected, Carlson/Juniper reserves the right to decline services defined by these Carlson/Juniper Service Plans</i></p> |                                                                    |          |

## Mesa 2 Hazloc

Integrated 4G LTE Modem  
 Integrated 1D/2D barcode scanner  
 High Power UHF RFID Reader module integrated into the Mesa 2 with integrated internal antenna. EPCglobal Gen 2 protocol support with ATA RFID TAG Licensing.

### System Includes:

Main unit with orange corner bumpers  
 Removable Lithium-Ion Battery  
 AC Wall Charger with International Plug kit  
 Adjustable Hand Strap  
 Capacitive Fine Tip Stylus w/ Tether  
 Quick Start Guide  
 BT v4.0 +EDR, BLE Support / WiFi 802.11 a/b/g/n

### Optional Vehicle Accessories

| Part # | Description                                                                                                                                                                                                                                                                                                                                                                                                                        | Price (USD)  |

### Mesa Rugged Notepad

| Part # | Description | Price (USD) |
|--------|-------------|-------------|
|--------|-------------|-------------|

**EOL Notice: The original Mesa is now End of Life. All last time buys (purchase orders) need to be received by September 30th 2017. The last production of Mesa will occur in December 2017 and the final shipments of Mesa will be shipped no later than December 29th 2017.**

**Accessories for the original Mesa will be available for purchase beyond December 29th 2017.**

The non-incendive Mesa Rugged Notepad™ from Juniper Systems, Inc. is Intertek approved Non-Incendive Class I Div 2 per approval standard ANSI/ISA-12.12.01 CSA C22.2 No. 213 in the U.S. and Canada.

The non-incendive Mesa may be used in hazardous locations where ignitable concentrations of flammable gases, vapors or liquids are not part of the normal environment but can become so under unusual circumstances.

Pricing: **Upgrades**

- Upgrades are ONLY applicable when changing software VERSIONS of the same product (not cross-edition, such as Premium to Ultimate, nor cross-product, such as MicroSurvey CAD to embeddedCAD) - if you need to change the edition or product, you may need to add a second line item for the crossgrade (see section below).
- All upgrades (with exception of embeddedCAD) come with an Annual Maintenance Subscription (AMS) - check the **Annual Maintenance Subscriptions** section above to view the subscription value

| CCP-MAP-EXT-PC-REA                                                                                  | Point Cloud Extension Reactivation Fee for expired Customer Care Package | \$650  |

Pricing: **Upgrades**

- Upgrades are ONLY applicable when changing software VERSIONS of the same product (not cross-edition, such as Premium to Ultimate, nor cross-product, such as MicroSurvey CAD to embeddedCAD) - if you need to change the edition or product, you may need to add a second line item for the crossgrade (see section below).
- All upgrades (with exception of embeddedCAD) come with an Annual Maintenance Subscription (AMS) - check the **Annual Maintenance Subscriptions** section above to view the subscription value

• Prices shown in USD.
